

The Utopia Prime range in Twin, Triple, and Quad configurations, offers heating and air-conditioning solutions for large spaces such as stores, office floors, warehouses, and restaurants.

It allows you to manage several indoor units running on the same settings. You can connect up to 4 indoor units – different model types and different duties – to the same R32 or R410A outdoor unit. They come in the following models: 4-way cassette units, ducted units, wall units, and ceiling units.

Utopia Prime (Twin, Triple, Quad) R410A or R32

Benefits Utopia Prime

Range overview

The R32 refrigerant has a number of advantages over the R410A refrigerant. Although both are “fluorinated greenhouse gases covered by the Kyoto Protocol,” the R32 has a lower global warming potential (GWP = 675) compared to the R410A (GWP = 2088). In addition, the use of R32 reduces the refrigerant charge by 7% to 12% for the same installation with R410A. The R32 reduces its environmental impact by 75% compared to the R410a: low GWP and less charge on the system. This means it has a lower TeqCO2 equivalence, and a low load is needed to achieve better results because of its better thermodynamic characteristics. Another advantage of the R32 over the R410 is its greater ease of recovery and reuse, taking into account the fact that the installation and maintenance are very similar.

Outdoor units	Rated cooling capacity (Hp)				Technology	Supply voltage	Connection rate range	Max. number of connected indoor units	Min. power of connected indoor units	Max. pipe length	Max. level difference between outdoor unit and indoor unit (outdoor unit above / below)	Max. level difference between indoor units	Operating ranges
	3	4	5	6

Utopia Prime

A TWIN to QUAD solution with a choice of R410A or R32 to provide heating solutions and air-conditioning for large spaces.

**EXCLUSIVITY
HITACHI**

NEW

Twin and VRF shared indoor unit groups

The UTOPIA PRIME range comes with all the advantages of VRF indoor units, so you can make use of a wide range of combinations. Different types of indoor units can be mixed on the same installation.

Flexible installation

UNIQUE! The new range of 4 to 6Hp can come in TWIN, TRIPLE, or QUAD configurations for R32 and R410A and has a static pressure of 30Pa. This allows the air to be recirculated. Connect up to 4 indoor units in the Set free range (size 0.8Hp Mini compatible; console units not compatible).

Advanced anti-corrosion treatment

With its triple coating, Utopia Prime offers the best protection on the market for use in tough environments.

Reinvented master-slave control for more energy savings

The outdoor unit will start up only if all 4 indoor units need cooling or heating. The shutdown of the group is triggered as soon as one of the indoor units no longer requires heat/cooling, which promises real energy savings.

Large operating ranges

Utopia Prime will keep working in extreme temperatures: down to -20°C for heating and -15°C to 46°C for cooling (-5°C to 46°C at 4 to 6Hp). Features that make this a product for perfect year-round comfort.

Exclusive to Hitachi: all our System Free indoor units are compatible with the outdoor units Sigma, Set Free Mini, VRF Centrifugal, Utopia Prime, Micro VRF IVX Prime and IVX Comfort, in VRF or Split versions. They can be operated by a wide range of remote controls, from the simplest to the most sophisticated, to meet any requirement. The option to adjust the power of these indoor units brings a unique flexibility to the market, responding to the scalability of buildings at a lower cost.

— SYSTEM FREE indoor units

SYSTEM FREE indoor units

A new range of indoor units compatible with refrigerants R32 and R410A.
FSR: R410A/R32

All our Set Free indoor units will be updated, with the exception of consoles RPF/RPFI and > 6Hp ducted units, which will remain compatible with R410A only.

4-way cassette unit

600 X 600
RCIM-...FSRE

800 X 800
RCI-...FSR

- Available from 1.1 to 16 kW.
- 600 x 600 flush cassette unit.
- Save energy with the motion sensor (optional).
- Control each fan louvre separately.
- Up to 850 mm lift for condensate.

2-way cassette unit

RCD-...FSR

- Available from 2.2 to 16 kW.
- Save energy with the optional motion sensor.
- Up to 850 mm lift for condensate.
- Control each louvre separately.

Ducted unit

RPIL/RPI/RPIH-0.4-6FSRE
RPI-8-20FSN

- Available from 1.1 to 56 kW.
- Up to 850 mm lift for condensate.
- Up to 220 Pa available static pressure.

Wall unit

RPK-...FSRM

- Available from 1.1 to 11.2 kW.
- Optional deposed electronic expansion valve.
- 4 fan speeds available.
- Integrated infrared receiver.

Console

RPF-...FSN2E

- Available from 2.2 to 7.1 kW.
- Cased and un-cased version.
- Depth of just 220 mm.
- Integrated remote control (on cased model).

Ceiling unit

RPC-...FSR

- Available from 3.8 to 16 kW.
- Air flow suitable for large premises.
- 4 fan speeds.
- Pipe connections from 3 directions.

Hydro Free

High-temperature
RWHT-5.0VNF1E

Low-temperature
RWLT-5.0~10VN1E

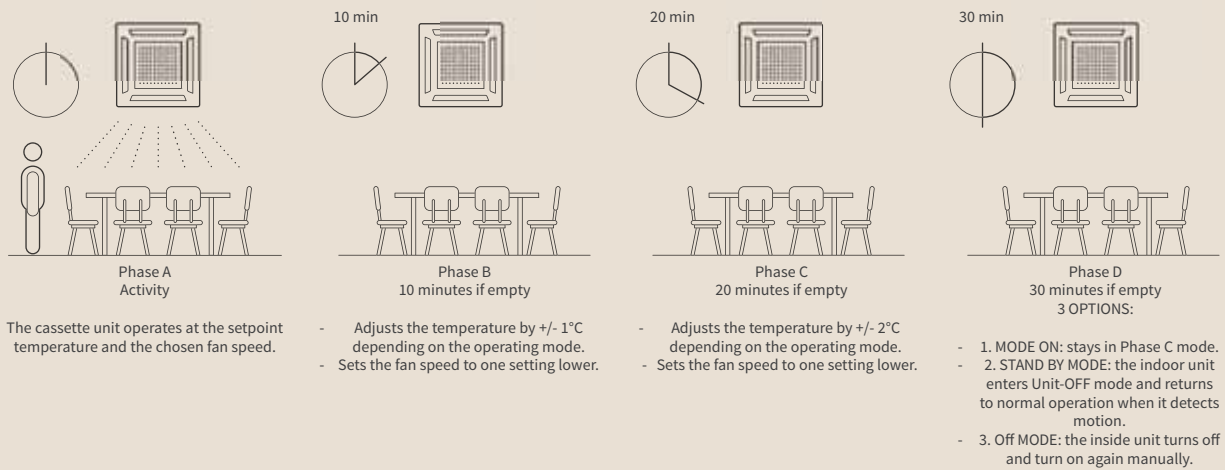

- Compatible with VRF SIGMA and Set Free Mini
- Perfect for a thermodynamic DHW solution (high-temperature module, 80°C).
- Perfect for a water heating solution in addition to DX comfort (low-temperature module).

Benefits

SYSTEM FREE indoor units

1

Save energy with the motion sensor

The motion sensor regulates the indoor unit according to the number of people in the room. Achieve up to 14% energy savings by avoiding unnecessary consumption when the room is unoccupied.* Option available for: 600 x 600 cassette unit, 800 x 800 cassette unit, ducted unit, ceiling unit.

2

Perfect integration

The 600x600 4-way cassette is designed to fit seamlessly into suspended ceilings.

These indoor units fit perfectly into any small space.

3 Extended height for condensate extraction

Integrated as standard on cassette and ducted units (optional on ceiling units), the extraction pump can handle as much as 850 mm of condensation. The pump automatically triggers as soon as cooling mode is selected. Self-powered condensing pump: any fault on a unit's condensing pump will not affect the rest of the system.

4 Low noise with the separate EEV

With indoor wall units, you can place the EEV outside of the room, significantly reducing noise levels for the best acoustic comfort.

5 Higher air flow rate

Same duty but more air flow than competitor's cassette, wall, and ducted units. Our indoor units have 4 fan speeds to adapt the airflow and ensure more comfort in any room.

6 Range compatibility

All our System Free indoor unit ranges are compatible with all our outdoor units (Set Free Sigma, Set Free Mini, Centrifugal, Utopia Prime, IXV Prime, and IXV Comfort). Hydrofree compatible with SIGMA and Set Free Mini only.

* For more information, please refer to the technical documentation.

600 x 600 4-way cassette unit

Installation time

The 600 x 600 cassette unit has a compact design and flush front panel to integrate perfectly into suspended ceilings (570 x 570mm casing). In addition, it is equipped as standard with a pump to remove condensation up to 850 mm.

Low noise level

With 4 fan speeds, this 600 x 600 cassette unit is one of the most silent on the market.

Energy-saving

The motion sensor (optional) automatically optimizes the level of comfort while limiting the energy consumption in rooms only occupied occasionally. It continuously analyzes thermal disparities as well as the presence of people in the room, adjusting its setting temperature (+/- 2°C), fan speed, and airflow direction to suit.

Unrivalled comfort

The GENTLE COOL function, accessible on the wired remote control PC-ARFP1E, adjusts the min. air off temperature. In summer, cold air drafts are avoided as you can set the air off temperature to the maximum setting.

Flexibility

Our 600 x 600 cassette units have an impressive range of 1.1 to 7kW, offering flexibility like no other on the market. You can also use the adjustable power settings to respond precisely to each project: 4 settings to choose from, with huge ranges in airflow.

Silent-Iconic fascia panel for cassette unit 800x800

Design
White

Design
Black

Discover Silent-Iconic

Features

A design that fits perfectly into any space
Designed to harmonize with the room – the shutter-like intake flaps are placed centrally and the fan blades are darkened to complete the discrete look.

Air extraction grid

Concealed fan blades

Easy-clean filter
The “fascia panel design with elevating grille” makes it easy to clean the filter. The lowering distance can reach 4 m, and the Silent-Ionic fascia panel can be installed in buildings with a high suspended ceiling heights.

Guaranteed ease-of-use
The all-new fascia panel louvre design and air outflow shape enhance the Coanda effect, which significantly improves user comfort by avoiding the direct impact of cold air circulation.

Easy-to-install front panels
Sliding edges make installation easier – just add the screws.

Designed to align with the ceiling surface
The small gap between the fascia panel and the ceiling gives a visual effect of “lightness” and blends in with the ceiling.

800 x 800 4-way cassette unit

Standard White front panel

Standard Black front panel

Installation time

The 800 x 800 cassette unit fits perfectly into suspended ceilings thanks to its low recess height (248 mm) as well as in high ceilings with a possible installation of up to 4.20 m, depending on the model. In addition, it is equipped as standard with a pump to remove condensation up to 850 mm.

Unrivalled comfort

The GENTLE COOL function, accessible on the wired remote control PC-ARFP1E, adjusts the min. air off temperature.

In summer, cold air drafts are avoided as you can set the air off temperature to the maximum setting.

Energy-saving

The motion sensor (optional) automatically optimizes the level of comfort while limiting the energy consumption in rooms only occupied occasionally.

It continuously analyzes thermal disparities as well as the presence of people in the room, adjusting its setting temperature (+/- 2°C), fan speed, and airflow direction to suit.

Flexibility

Our 800 x 800 cassette units have an impressive range of 2.8 to 16 kW, offering flexibility like no other on the market.

You can also use the adjustable power settings to respond precisely to each project: 4 settings to choose from, with huge ranges in airflow.

2-way cassette unit

Unrivalled comfort

The GENTLE COOL function, accessible on the wired remote control PCARFP1E, adjusts the min. air off temperature. In summer, cold air drafts are avoided as you can set the air off temperature to the maximum setting.

Stand-out solution

Our choice of 2-way cassettes, ranging from 2.2 to 16 kW, is the perfect solution for larger rectangular spaces. You can also use the adjustable power settings to respond precisely to each project.

Installation time

This unit is easy to install thanks to its light weight (23 kg) and the lift pump (850 mm) built-in as standard.

Energy-saving

The motion sensor (optional) automatically optimizes the level of comfort while limiting the energy consumption in rooms only occupied occasionally. It continuously analyzes thermal disparities as well as the presence of people in the room, adjusting its setting temperature (down to 2°C), fan speed, and airflow direction to suit.

Potential for discomfort

GentleCool → No cold drafts

Ultimate comfort

GentleCool: OFF

GentleCool: LOW

GentleCool: MEDIUM

GentleCool: HIGH

Ducted unit

GENTLE COOL air off temperature setting for ultimate comfort

The GENTLE COOL air off temperature setting, accessible on the wired remote control PC-ARFP1E, adjusts the min. air off temperature. There is minimal risk of condensation forming, which improves the air quality. It also stops any summer drafts.

Flexible installation

Our new ducted units offer greater flexibility when it comes to installation. The electrical box can be moved. The 100Pa model has rear pipework connections so it can easily fit into small spaces, and the pump can be disconnected onsite.

Easy maintenance

Up to 850 mm lift for condensate. Filter is accessible from below or the side (0.4 to 6 hp).

Compatible with Airzone solution

Thanks to its partnership with Airzone, Hitachi is able to offer you precision step-by-step temperature control.

30% fresh air supply

All Hitachi ducted units can work on 30% fresh air to provide the best quality and cleanest air.

Available in sizes 45 and 56 kW

The most extensive range on the market, from 1.1kW to 56 kW.

EXCLUSIVE

Slim ducted unit 100 Pa 1.1 to 4 kW

- Integrated and removable condensate pump.
- Filter accessible from below or from the right side.
- Low-height: 197 mm.
- Pipe connections from the rear.
- Electric box (can be moved)
- Air return from the rear or from below (optional).

Ducted unit 150 Pa 4 to 16 kW

- Condensate pump included.
- Air retrain from the rear or below (optional).
- Optional motion sensor.
- Height: 240 mm.
- Electric box (can be moved, sizes 1.5 and 2 hp).
- Filter accessible from below or from the left or right side.

Ducted unit 200 Pa 11 to 16 kW

- Condensate lift pump included.
- Air retrain from the rear.
- Filter accessible from below or from the left or right side.

High-Pressure High-Capacity ducted unit 22 to 56 kW

- Up to 220 Pa available static pressure.
- Sizes 8, 10, 16 and 20 hp.

Connected and intuitive interfaces

Airzone Blueface Thermostat
Wired connection / 3.5" touchscreen: Configurable as a general thermostat or by zone. A number of features and settings, ideal for ultimate control of your entire system, for more efficient and responsible heating. End-to-end, intuitive interface. Eco-adapt and standby function for tangible energy saving. Control the temperature, mode, and fan speed. Weekly programming. Access to weather forecasts (with Airzone Cloud webservice login) to anticipate changes in temperature.

Airzone Think thermostat
Wired or wireless connection / 2.7" screen: Configurable as a general thermostat or by zone. Low-energy device that makes it easy to reduce energy costs. Stylish and intuitive interface. Control the temperature, mode, and fan speed. Access to weather forecasts (with Airzone Cloud webservice login) to anticipate changes in temperature.

Thermostat Airzone Lite
Wired or wireless connection: In systems with the Blueface thermostat, this solution is perfect for quick access to essential functions. Its modern and fun interface makes it easier to use, with colors indicating the mode and temperature of the area. Start/ Stop function. Control the setting temperature in increments of 1°C with a scope of ±3°C.

Webserver Airzone Cloud
The Airzone Cloud app, compatible on your smartphone, tablet, and PC, offers complete remote control of the installation; anywhere, anytime. You can control multiple servers at once and up to 32 systems on a single webserver. All the features of your thermostats are combined on the cloud: Control the temperature, weekly programming, weather forecasts, login authorization...

Ducted unit 150 Pa (RPI-1.5~6FSRE)

Ducted unit 200 Pa (RPIH-4~6FSRE)

High-Capacity ducted unit

Wall unit

One of the most extensive ranges on the market: 17 models

With models ranging from 0.4 hp to 4.0 hp, Hitachi offers one of the biggest ranges on the market, with a harmonized design across all models. You can also use the adjustable power settings to respond precisely to each project.

Easy and discreet integration

Our units are so compact and lightweight that you can easily install them discreetly above a doorway. To help with maintenance work, the fan motor on the 2 hp to 4 hp models can be replaced without disassembling the exchanger.

Unrivalled comfort

The "GENTLE COOL" air off temperature setting, accessible on the wired remote control PC-ARFP1E, adjusts the min. air off temperature. In summer, cold air drafts are avoided as you can set the the air off temperature to the maximum setting.

Silent operation

0.4 to 1.5 hp units can be ordered without an expansion valve (version H) to keep the expansion valve apart from the unit (part no. EV-1.5N1 order separately) for even quieter comfort. As such, our units are ideal for hotel use.

Central control

Our wall units are compatible with all types of remote control and feature an integrated infrared receiver as standard. Available as an option, with the PC-ALHZ1 infrared receiver you can operate multiple units on the same remote control. (Fig.1)

Higher airflow rate

Use the 4 fan speeds to adapt the airflow for comfort in every room.

Unrivalled comfort

The GENTLE COOL air off temperature setting, accessible on the wired remote control PC-ARF1E, adjusts the min. air off temperature. In summer, cold air drafts are avoided as you can set the air off temperature to the maximum setting.

Even greater flexibility

To suit any requirement, the console comes in an uncased version (horizontal or vertical blowing) as well as cased. You can also use the adjustable power settings to respond precisely to each project.

Compact design

Just 220 mm deep, uncased units can be installed anywhere on the wall, taking up very little floor space. The 630 mm height makes it an ideal solution for air-conditioning or heating a room.

Integrated remote control

For easier access, the remote control can be integrated into the console itself (Fig.1)

Adapted air circulation

On Hitachi uncased consoles, you can change the blowing direction to suit any need. (Fig.2)

Ceiling unit

Energy-saving

The motion sensor (optional) automatically optimizes the level of comfort while limiting the energy consumption in rooms only occupied occasionally. It continuously analyzes thermal disparities as well as the presence of people in the room, adjusting its setting temperature (+/- 2°C), fan speed, and airflow direction to suit.

Wide operating ranges

4 fan speeds to suit every need, provide comfort, and make savings.

Flexible implementation

Condensing pumps are offered as an option to provide a high level of installation flexibility.

Unrivalled comfort

The GENTLE COOL air off temperature setting, accessible on the wired remote control PC-ARFP1E, adjusts the min. air off temperature. In summer, cold air drafts are avoided as you can set the air off temperature to the maximum setting.

Hydro Free Low-Temperature

Heating mode only

Heating applications

The Hydro Free module (low temperature, 45°C) is compatible with underfloor heating and fan coil units. This solution ensures maximum thermal comfort with the DX/hydraulic combined solution. This compact and ultra-silent module offers the most comfort for renovation projects.

Compactness

A single solution: the VRF installation is made even easier with the Plug-Play system. The module has all the necessary equipment as standard: pump, filter, expansion tank, purges, manometer ...

Setup example

Indoor units

RWLT-3.0VN1E

RWLT-5.0VN1E

RWLT-10.0VN1E

Compatible with outdoor units SET FREE SIGMA: RAS-FSXNSE, RAS-FSXNPE and SET FREE Mini L (8/10/12hp).

Indoor units		Unit	RWLT-3.0VN1E	RWLT-5.0VN1E	RWLT-10.0VN1E
Rated power Heating (7°C outside / 35°C water)		kW	9	16	27
Heating capacity (-7°C outside / 35°C water)		kW	5.5	11.5	17.7
Heating capacity (-7°C outside / 45°C water)		kW	5.2	11.1	15.61
Sound power		dB(A)	37	39	47
Net weight		kg	35	50	62
Unit dimensions	Height (with connections)	mm	712 (782)	890 (960)	890 (960)
	Width	mm	450	520	670
	Depth	mm	275	360	360
Water flow	Nominal	m³/h	1.5	2.7	4.7
Min. system water capacity		L	100	150	180
Power supply		-	1~ 230V 50Hz		
Max. consumption		kW	0.05	0.08	0.14
Refrigeration connection type		-	Flare nut	Flare nut	Liq: Flare nut - Gas: Brazed
Diameter of pipes (Liq - Gas)		inches	3/8" - 5/8"	3/8" - 5/8"	3/8" - 7/8"
Hydraulic connections (male/male valves supplied)		inches	1"	1 - 1/4"	1 - 1/4"
Hydrofree connection rate		-	0 ~ 100%		
Min. overall index of DX* units		-	50%		
General connection rate of Hydrofree + DX units	2-pipe VRF*	-	50% ~ 130%		
	3-pipe VRF*(2)	-	RAS-FSXNSE: 50% ~ 150%		
		-	RAS-FSXNPE: 50% ~ 200%		
Max. number of indoor units with Hydrofree installed (1)		-	38		
Temperature range of water outlet in heating mode		-	20°C ~ 45°C		

* Important: simultaneous operation can never be higher than 100% in heat pump mode.
 Simultaneous operation in the same mode can never exceed 100% for a VRF system in heat recovery mode.
 (1) The maximum number of indoor units is the recommended quantity of indoor units for every size of outdoor unit. For more information, please refer to the technical catalog of the outdoor unit.
 (2) See Section 9.5.2.2 "Function of DIP switches and dial switches" in the technical catalog for more information on Pin 3 of the DSW8 with a connection rate of > 180%.

You can have multiple contacts with the connector PCC-1A: progress report, error report, thermostat control, remote "Start/Stop".

Controls and compatible accessories (see page 48)

Hydro Free High-Temperature

Heating mode only

For a variety of applications

- High-temperature heating: combined with the VRF Sigma or SET FREE Mini 2/3-pipe.
- Constant DHW production: combined with the VRF Sigma or 3-pipe SET FREE Mini.
- Timed DHW production: combined with the VRF Sigma or 3-pipe SET FREE Mini.

The Hydro Free high-temperature system is ideal for high-temperature hot water needs for renovation projects, as heat is recovered via the CH box on indoor units operating in cooling mode.

2-in-1 system

A single unit to meet 2 needs: **heating and DHW**. The High-Temperature Hydro Free system produces hot water up to 80°C from renewable energy (no anti-legionella cycle required).

Smart operation

High-Temperature Hydro Free models are equipped with 2 compressors operating on a smart cascading system, and 2 refrigeration cycles (R-410A and R-134A): the second cycle occurs only if the inlet temperature is greater than or equal to 30°C or when the outlet temperature is greater than or equal to 45°C.

Setup example with 3-pipe system

Indoor units

RWHT-5.0VNF1E

* Important: simultaneous operation can never be higher than 100% in heat pump mode.
Simultaneous operation in the same mode can never exceed 100% for a heat recovery system.

(1 *) The maximum number of indoor units is the recommended quantity of indoor units for every size of outdoor unit. For more information, please refer to the technical catalog of the outdoor unit.
(* 2) See Section "9.5.2.2 Function of DIP switches and dial switches" for more information on Pin 3 of the DSW8 with a connection rate of > 180%.

You can have multiple contacts with the PCC-1A connector: progress report, error report, thermostat control, remote "Start/Stop".

Controls and compatible accessories (see page 60)

Hitachi wants to bring more and more comfort to its customers. The user interface is key to that objective. This extensive range of controls is perfect for the needs of anything from small to large public sector projects. It offers more features than any other range on the market, in unique versions as standard. Installation is quick and easy.

Managing the systems Utopia Prime, IVX, and VRF

Selection guide to controls

Specific remote controls

Hard wired

PC-ARFP1E

Intuitive interface.
Manage 1 to 16 indoor units as masters and/or slaves.
Built-in temperature sensor.
Adjust optional settings.

New features

- To optimize energy consumption: ECO button, energy consumption display.
- For more comfort: setpoint adjustable to $\pm 0.5^{\circ}\text{C}$, GENTLE COOL function, frost protection function, night setback for outdoor unit.
- For more flexibility: new Master/Slave function which allows multiple indoor units to have the mode changed and be set by one remote control.

Ideal for maximum flexibility in all commercial applications.

Simplified wired

PC-ARH1E

Manage 1 to 16 indoor units as masters and/or slaves.
Simplified access to essential functions.
Adjust optional settings.

New features

- For more comfort: setpoint adjustable to $\pm 0.5^{\circ}\text{C}$, frost protection function.

Ideal for hotels, shops, when simplicity is key.

Infrared

PC-AWR

Manage 1 to 16 indoor units as masters and/or slaves.
Simplified access to key functions.
Infrared receiver function.

IR receiver	Compatibility with indoor units	
Include with the unit	Wall units	RPK-FSRM / RPK-FSRHM
PC-ALHC1 PC-ALH3 PC-ALHD1	4-way 600x600 cassette unit 4-way 800x800 cassette unit 2-way cassette unit	RCIM-FSRE RCI-FSR RCD-FSR
PC-ALHZF1 (external)	Ducted units Consoles	RPI / RPIM / PPF / RPF1 / RCI RCIM / RCD / RPK / RPC
PC-ALHP1	Ceiling units	RPC

Ideal for renovations.

Centralised controls

Touch screen controls

PSC-A32MN
PSC-A64GT

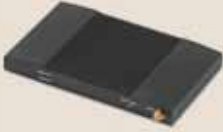

Manage up to 160 indoor units:

- PSC-A32MN > up to 32 groups of 16 indoor units, max. 160.
 - PSC-A64GT > up to 64 groups of 16 indoor unit, max. 160. Up to 8 touch controllers per H-Link bus.
- 5" (PSC-A32MN) and 8.5" (PSC-A64GT) color touchscreen.
Up to 100 stored alarms.

Available contacts: start/stop, fault report, function report.
Demand control possible from external contact to reduce capacity.
In the case of using PSC-6RAD, max. 16 units allowed.

Ideal for monitoring small and medium-sized systems.

airCloud Pro

NEW

You're in control

IoT technology

24/7 control at your fingertips, via your smartphone app or web

Intuitive simplicity

airCloud Pro is designed to make it easier for you. This open-access mobile app makes it easier than ever to manage your air-conditioning systems.

Control from anywhere

Enjoy remote access from your smartphone or PC. airCloud Pro lets you remotely control an unlimited number of variable coolant flow systems (VRF) from a single app, which means you can stay right where you are.

A simple yet powerful tool

Make your life easier

Central control

Control either the entire VRF system or specific zones all at the touch of a button.

Simplified troubleshooting

Clear error code history, brief summary of the problem, and reminder to clean filter.

Smartphone alerts

To report any serious malfunction.

Flexible user management

Add unlimited users and customise access restrictions.

1

Save more energy

Energy consumption data

View your electricity consumption in simple graphs to monitor the units with heavy-usage in your system (available in 2022).

Intuitive planning

Plan service visits around your working day and exceptions such as holidays.

Individual controller lock

Block any inappropriate use by occupants.

2

Create a pleasant climate

Easily adjust the **temperature, fan speed, and operating modes** for complete comfort and an ideal ambient climate throughout the building.

A **built-in weather forecaster** helps you define the conditions most suited to different indoor spaces throughout the year.

3

Ideal applications

Technical specification €€

HC-IOT GW

Dimensions (W x H x D)	138 x 200 x 41 mm
Net weight	540 g
Connection capacity	16 outdoor units + 64 indoor units
Power supply	230V 50Hz
Max. power consumption	10W
Communication port	1 H-Link, 1 port RS485
Internet connection	Local network (Ethernet) or 4G ²
External interface (data storage)	1 micro SD card slot

Plug & play system

The airCloud interface makes installation easy. Just connect to airCloud via the **3G/4G² or Ethernet** network and pair your VRF systems by scanning the QR code. With **automatic detection of indoor units** and an optimised installer view, configuring your site and zones has never been quicker.

4

+ data security

- **The highest standards:** Protocol TLS v1.2, HTTPS 2038 encryption
- **Minimal personal information requested:** You only need your name, email address, and phone number to log in
- **Regularly updated and enhanced with new features,** airCloud Pro ensures you're always up to date.

Selection guide

CSNet centralized controls

The CSNET range comes in two versions: a WEB version that offers flexibility and a touchscreen version for usability.

This range is ideally suited to the needs of any size project: from small to large commercial buildings. It offers more functionality than any other range on the market as standard without add-ons. Installation is quick and easy. Guided configuration makes things even easier.

Central control

Centralised control with touchscreen

CSNET Manager 2T10 / 2T15
+ HC-A64NET interface

Accessories

Wall bracket – Part no.: WALL SUPPORT 2
Base – Part no.: STAND SUPPORT

Manage up to 1,024 indoor units.

Manage 1 to 64 indoor units per HC-A64NET gateway and up to 16 gateways via CSNET. The HC-A64NET gateway can be replaced with CSNET Lite.

Comes with a 10" (2T10) or 15" (2T15) screen.

- True maintenance tool: mail notifications, alarm log, data archive.
 - Multi-site remote management and control tool with the web server function.
 - Tool for managing and breaking down energy consumption.
 - Interlock option: smart programming of IFTTT actions.
 - Compatible with Fidélío software: perfect for the hotel industry.
- Interface compatible with smartphones, tablets, PCs connected to the local network or via the web.

New features

- Next-generation touchscreen for a more enjoyable user experience.
- New, more intuitive responsive user interface that offers the same features on any screen.
- Wizard function for easier, faster commissioning.
- Master/slave operation of indoor units: no electrical wiring needed for a more flexible and less expensive installation.

Ideal for managing large installations with maximum comfort for occupants and ease of access for maintenance teams.

Centralised control, Web version

CSNET Manager SL +
interface HC-A64NET

Accessory
DIN rail support

Manage up to 1,024 indoor units.

Manage 1 to 64 indoor units on the HC-A64NET gateway and up to 16 gateways via CSNET. The HC-A64NET gateway can be replaced with CSNET Lite.

With the same features as the CSNET Manager 2T10/2T15, this SL version is a web version.

System control is done on smartphone, tablet, or PC only, connected to the local network or via the web.

New features

- More flexible installation: Ethernet port, 2 USB ports, HDMI port.

Ideal for managing large facilities.

Centralised control standalone web version

CSNET Lite

Standalone gateway to run up to 64 indoor units.

Has limited functionality of CSNET Manager 2.

Compatible with smartphones, tablets, PCs connected to the local network or via the web. For multi-site monitoring, CSNET Lite is compatible with CSNET Manager 2T10/2T15 and SL

Ideal for managing small and medium-sized facilities.

With this **CSNET range**, you can manage 1 to 64 indoor units on the interface and up to 1024 indoor units, locally or remotely on the WEB.

CSNET Manager 2 is a management and monitoring interface for Hitachi heating and air-conditioning systems. It features new touchscreen technology as well as a responsive display, for an improved user experience.

The **CSNET Manager 2 T10 / 2 T15 range**, includes 2 screens, 10" and 15".

The **system is managed** on two H-Link interfaces of your choice, HC-A64NET or CSNET Lite, capable of managing up to 64 indoor units. CSNET Manager 2 can manage up to 16 H-Link interfaces.

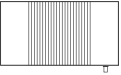

For **installation extensions**, CSNET Manager 2 is also compatible with the old CSNET Web (limited for certain options).

The **320 GB storage capacity** allows you to store a virtually unlimited amount of system applications and histories.

CSNET Manager 2: Advanced management tool

Stand out with quality service

Maintenance is essential because it ensures a long term life cycle of the system. Preventing faults and being responsive in the event of a fault by reducing intervention time with remote analysis tools are the key to meeting end user requirements.

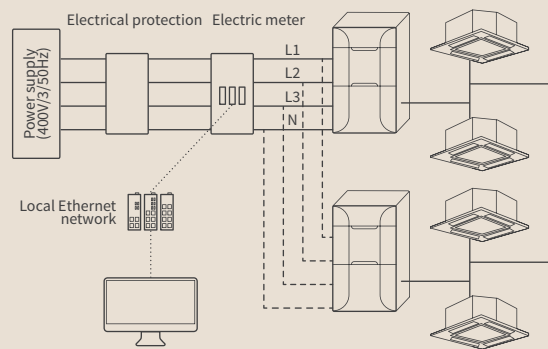

Better control of energy consumption

To offer its customers a secure solution, HITACHI has fully tested and validated select meters with CSNET Manager and VRF systems in the factory. This standard feature allows you to measure, record, and display the energy consumption of all or some of the indoor units and outdoor units managed by CSNET. This consumption is shown in kWh or in £/€ if the user enters their hourly energy cost.

SIEMENS 7KM
PAC3200

SOCOMEK Countis
E27 & E28

Monitoring energy consumption means first and foremost access to information. Various interfaces are available in the 2021 version of CSNET, offering different dashboards with different levels of analysis: from general to specific, monthly to daily.

This feature also allows for multiple tenants to distribute energy consumption per user and by use (Heating or Cooling mode).

On board security: Interlock function

The embedded interlock function, standard in all CSNET interfaces, allows a multitude of interlock scenarios to be easily programmed, providing automated safety in more industrial applications.

For example, a backup air-conditioning unit installed in a server room can be automatically switched on in case of a temperature deviation: If the ambient temperature > 20°C unit 2 will start up with a set point of 18°C.

New feature:

Server room management feature in CSNET Manager version 2.0

Fault alerts

An email server can send an email alert if an error code appears on the system.

An alarm log is automatically generated by CSNET Manager 2 as soon as the first fault occurs. This log can be exported at any time.

Have remotely accessible analytics tools via the WEB SERVER function for PC, tablet, or smartphone

Access the installation's operating history. These configurable reports allow the user to plot graphs monitoring how the system performs at chosen settings and to create intervention reports.

Investigate a discomfort complaint reported by a customer and solve it remotely by changing operating settings.

A new Customer Experience with a unique and customizable level of comfort

Air off temperature setting, GENTLE COOL

This feature provides unsurpassed comfort levels for every user in Cooling mode by giving them the option to set their own tailored air off temperature.

- With CSNET, Cold drafts that can be a source of discomfort in the summer are a thing of the past in offices, thanks to the option of selecting a high air off temperature.
- With CSNET, an occasionally occupied meeting room can be quickly brought up to temperature by using an unlimited annual schedule synchronized with the calendar in Outlook.

Hotel function

This intelligent on-board programming function, included as standard in all CSNET interfaces, can combine several input signals triggering actions according to IFTTT logic.

- This function can customize comfort levels in rooms, both in summer and winter. When a guest arrives in their room (key insertion), a predetermined setpoint temperature can be activated.
- When opening the bedroom window, the indoor unit can be stopped or the set point adjusted.

Application for hotel rooms

- The CSNET is also compatible with MICRO FIDELIO software.

Manage your spare parts with Hi Parts
Log in any time, 24/7.

CSNET wiring

An example of a small site setup (< 64 indoor units)

Site 1: Access the local network with a screenless interface. Access from a computer, a smartphone on the same local network, or via the web.

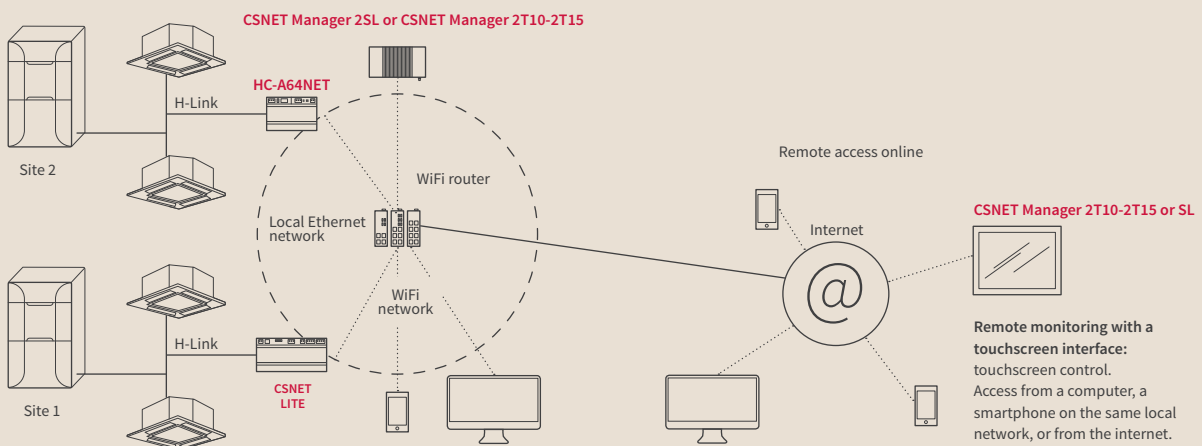

An example of a medium site setup (> 64 indoor units)

For large-scale systems, you can install up to 16 interfaces on an H-Link bus to run up to 16 x 64 indoor units (or 1,024 indoor units).

Site 2: Access the local network with a screenless interface. Access from a computer, a smartphone on the same local network, or via the web.

Example of the setup of 2 separate sites equipped with VRFs with centralized CSNET control and monitored remotely

Remote monitoring with a touchscreen interface: touchscreen control. Access from a computer, a smartphone on the same local network, or from the internet.

Connection of a CSNET Manager 2 T10 + 2 energy meters

2 separate VRF units = 2 refrigeration cycles

Connection of CSNET Lite + 1 energy meter

HARC-I/O interface (part no. PC-A1IO)

to manage and communicate with third-party equipment

This interface integrates external equipment such as AHUs or ventilation units into a Hitachi system and controls them like Hitachi appliances via CSNET. E.g.: Ventilation, air handling unit, cooling units, etc.

Functions:

- DI1: M/A management via dry contact.
- DI5: error display via dry contact.
- The interface should be addressed as an additional indoor unit of the outdoor unit.

Communication interfaces

HITACHI offers a full range of communication interfaces with most open protocols on the market.

Open protocols

MODBUS® protocol (Modbus® RTU or TCP/IP)

Most centrally managed sites with BMS feature a Modbus® connection. HITACHI interfaces manage 8, 16 or 64 units per gateway. They connect at any point on the H-link bus. They are RTU or IP in auto-detection.

Economic BMS solution: perfect for medium and small public sector buildings.

KNX protocol

KNX® is a "building"-dedicated bus, standardized and independent of manufacturers (lighting, heating, security, energy management, metering, etc.). New certified interfaces manage 16 or 64 units each. Based on standard buses, EIB, EHS, Batibus, KNX® guarantees the interoperability of products bearing the KNX® logo. It is an ISO standard.

BMS solution: perfect for medium and large commercial buildings.

BACnet®/IP protocol

The widely used BACnet/IP was designed to allow the protocol to use TCP/IP networks.

New certified interfaces directly manage 16 or 64 units each.

BMS solution: perfect for large commercial buildings.

LONWORKS protocol

Created by ECHELON CORPORATION, Lonworks is a recognized and accepted standard in Building Management (IEA 709.1/2/3).

These interfaces manage 32 or 64 units each.

The interoperability of equipment makes it possible to provide facilities with better thought-out services and maintenance.

BMS solution: perfect for medium and large public sector buildings.
