hawco

Our pick of the crop

for value cold rooms up to 45m³
& freezer rooms up to 16m³

The Wintsys range from Tecumseh offers an outstanding choice of condensing units, perfectly specified for smaller cold room projects.

Up to
5.8kW

R452A models with a wide cooling capacity between 0.4kW LBP to 5.2kW MBP. Three phase models also available up to 5.8kW MBP

Multi-
refrigerant

R452A models compatible with R448A/R449A. R134A models available on request

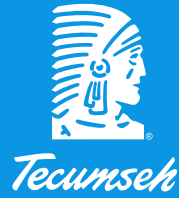

17
LBP & MBP
models

Wide selection of single phase models gives a precise match to the cooling capacity of each application

Prices from
£815.71
880W MBP

We keep our cold room equipment competitively priced so you can offer your customer an excellent combination of uncompromising quality and great value

Why Wintsys?

- 1 High quality electrical components pre-installed
- 2 High efficiency with reliable AC induction fan motor
- 3 Polypropylene case with side opening door for easy access

Versatile option for numerous applications

Fully-dressed and ready to install, with a Tecumseh reciprocating compressor, that is industry proven for reliability

Rugged enough to handle ambient temperatures up to 46°C

R452A LBP

SPECIFICATION OF COLD ROOM PACKAGES

Our technical team offer expert advice on the design of refrigeration systems, providing a complete quote covering all the equipment and installation materials required.

HEAT LOAD CALCULATIONS

We can also assist you with the calculation of heat loads, based on the room dimensions and its construction and the type of refrigeration required.

PRODUCT SUPPORT

We provide the technical information you need to make a quick decision about the equipment you require. We can also suggest alternatives based on the specific requirements of each application or to meet your customer's budget.
