Hawco engineers high-performance transport refrigeration systems to meet customer needs...

HAWCO EXPANDS TRANSPORT REFRIGERATION PRODUCT OFFERING AND DESIGN SERVICES

Surrey, U.K. (February 5, 2009) — Hawco, an international controls and refrigeration engineering service provider and distributor, has expanded its refrigeration product offering to provide total cooling solutions for mobile refrigeration applications. Hawco's broad product offering, combined with its engineering expertise, enables them to fulfill a wide range of customers needs, ranging from a single replacement component to a complete refrigeration system.

Hawco's mobile refrigeration units are currently being used to cool delivery vehicles, railway cars and storage refrigerators. Hawco provides LuVe Contardo cooling evaporators, Zeil-EBM fans, Hitachi Horizontal scroll compressors and ACC condensing units to improve performance and lower energy consumption. Hawco also supplies LAE transport refrigeration controllers that work accurately at voltage variances between 7V DC and 30V DC. Hawco engineers can customise and integrate many of the products, including coolers, condensing units and compressors to meet customer specifications.

Hawco refrigeration system replacement components, such as driers, sight glasses, check valves and ball valves are available in a wide range of specifications to meet customer requirements.
