

DETECT-A-FIRE Detection and Release Devices

Fenwal DETECT-A-FIRE® units from Hawco are the critical components of many fire protection systems. These highly reliable devices have been a standard of the industry for over half a century. Many thousands of these units are now in use controlling the release of extinguishants such as clean agents, CO₂, water (H₂O), or dry chemicals. In some systems the device is used as an ALARM device, to sense overheat or fire, and alert personnel. In other systems, it is used as a RELEASE device, to sense fire and actuate fire attack systems.

How they're used

In the majority of applications they serve as automatic actuation devices for fire suppression systems.

Why choose FENWAL?

In the majority of applications, as automatic actuation devices for fire suppression systems available with normally open or normally closed contacts.

- **Approvals:** The DAF® is the only heat actuated device approved to actuate systems. The others are approved only for alarm signalling. Approvals UL, ULC, FM. The DAF is the only heat actuated device approved for Releasing Device Service (normally open contact models only).
- **Versatility:** Offered in many different temperature settings, vertical or horizontal mountings.
- **Quality:** Each heat detector is individually calibrated and tested. For over 50 years, Fenwal has a reputation for high quality heat detectors.
- **Rate compensation:** Provides a unique advantage over both fixed temperature and rate-of-rise types of detectors due to its accuracy to sense the surrounding air temperature regardless of the fire growth rate.
- **Wide temperature ranges setting:** available from 140°F (60°C) to 725°F (385°C)

Typical applications

- Protection of commercial, industrial and public facilities
- Hazardous or explosive environments
- Grain elevators
- Offshore oil platforms
- Gas stations
- Range hoods
- Paint spray booths
- Vehicle fire suppression systems

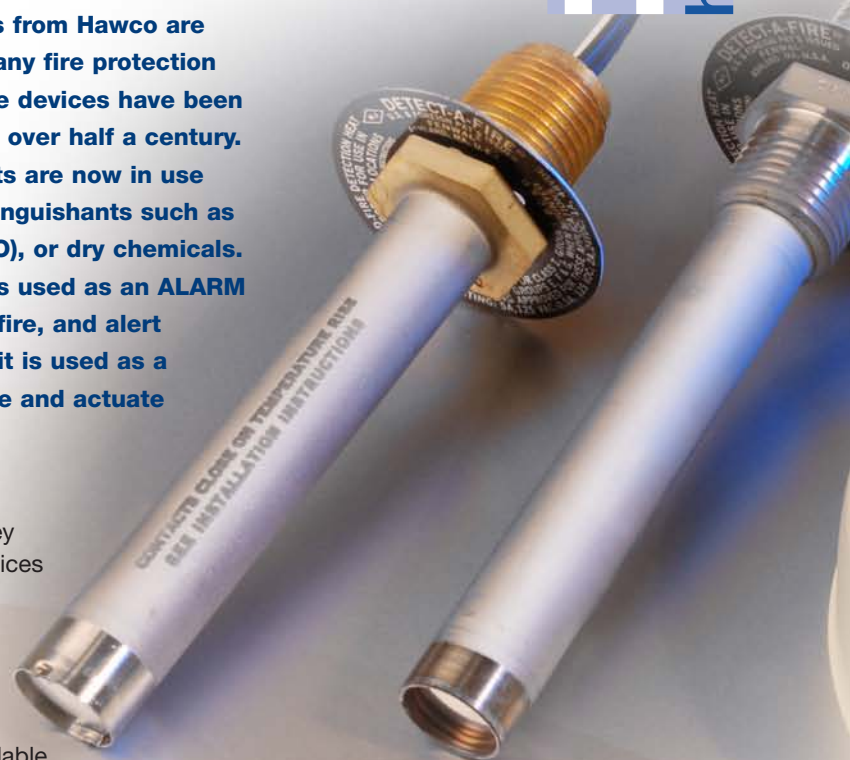

Hawco

The Wharf, Abbey Mill Business Park,
Lower Eashing, Godalming, Surrey GU7 2QN

hawco

Total Engineering Solutions

HAWCO offer a comprehensive range of products and applications

Thermal & circuit protection products

Heating & temperature control products

Electrical equipment & control devices

Fire detection products

Hawco is a specialist supplier of industrial automation, control solutions, temperature management, circuit protection components and complete turnkey solutions. Hawco is engineered to meet our customer's needs with technical and sales support that provide solutions from our extensive 'QuickPick' stock tool or a custom designed product.

Over 1,000 Focused Products in Stock

- Heaters
- Electrical Products
- Controllers
- Switches
- Relays
- Refrigeration & Cooling
- Thermostats
- Temperature Sensors
- Pressure & Vacuum
- Humidity
- Timers
- Indicators
- Level & Flow
- Microtherm
- Fire Detection
