- Notes:**
- 1) We recommend flux proofed types for a clean environment (free from contaminations like H<sub>2</sub>S, SO<sub>2</sub>, NO<sub>2</sub>, dust, etc.). We suggest to choose plastic sealed types and validate it in real application for an unclean environment (with contaminations like H<sub>2</sub>S, SO<sub>2</sub>, NO<sub>2</sub>, dust, etc).
  - 2) Contact is recommended for suitable condition and specifications if water cleaning or surface process is involved in assembling relays on PCB.
  - 3) For the applications of motor load, capacitive load and high inrush current, AgSnO<sub>2</sub> contact material is recommended. For the applications of resistive load or low inductive load, AgCdO contact material is recommended.
